ReDine

Reusables for any event and mood

The ReDine reusable products range is created with a clean and versatile design for any setting. Stuff it in your bags for a group hike. Use them to offer branded reusables at your café – or festival. Or combine them to set a neat table at an event, like a garden party.

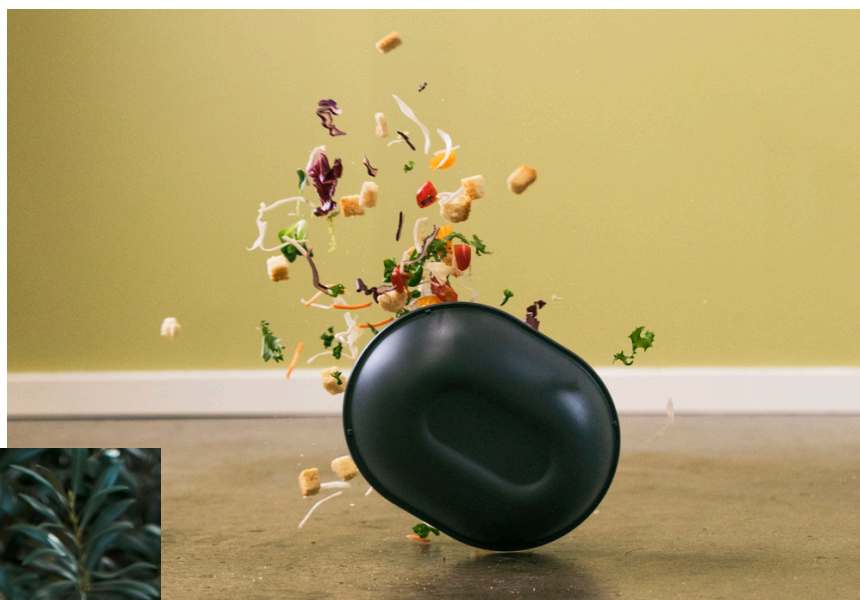

Basically: drop the reusable products any place you want a good food mood.

YES!

Drop it. Squeeze it. Microwave it. Pop it in the dishwasher.

Made from durable PP/PP + Mineral/ Tritan/SAN, the reusable plastic products are made to withstand claps, bumps and the most spontaneous of cheers. Meant for convenient reuse, all items are dishwasher safe and can handle 50+ cycles. To top it off: the reusable food containers, cups, plate and deep plate are safe to use in a microwave.

Materials

SAN (styrene-acrylonitrile) is a durable and transparent material known for its exceptional clarity and impact resistance, perfect for long-lasting items. SAN is currently used for certain products in our glasses range. The recyclability of SAN can vary across regions. It is advisable to refer to local guidelines and recycling programs for proper disposal and potential reuse. When recycling isn't possible, SAN can be responsibly directed towards energy recovery processes.

TRITAN (copolymer) stands out for its remarkable durability and unparalleled clarity, making it an excellent choice for enduring products. TRITAN is currently used for certain products in our glasses range. The recyclability of TRITAN can vary across regions. It is advisable to refer to local guidelines and recycling programs for proper disposal and potential reuse. When recycling isn't possible, TRITAN can be responsibly directed towards energy recovery processes.

Polypropylene (PP) is a durable material valued for its exceptional resistance, rigidity and manufacturing flexibility, making it an ideal material for crafting long-lasting reusable products. PP is currently used for certain products in our bowls, cutlery, cups and glasses ranges. Although polypropylene is recyclable and commonly accepted in many recycling programs, it is advisable to refer to local guidelines and recycling programs for proper disposal and potential reuse.

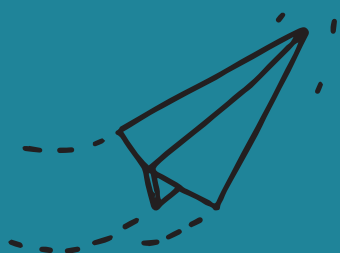

Polystyrene (PS) is a cost-effective and versatile material, known for its clarity and rigid properties, a good choice for reusable products. PS is currently used for certain products in our cutlery and glasses ranges. The recyclability of PS can vary across regions. It is advisable to refer to local guidelines and recycling programs for proper disposal and potential reuse. When recycling isn't possible, PS can be responsibly directed towards energy recovery processes.
